# WINDOWS

We only use the industry leading REHAU profiles to manufacture all of our systems. The systems offer exceptional quality in terms of both appearance and performance.

The REHAU system is extruded from RAU-PVC 1406 (unplasticised, modified polyvinyl chlorides) which is vigorously tested to temperatures as low as -40° and up to +60° without losing any quality or durability.

The REHAU profile offers much more than just exceptional performance but superb aesthetics. The smooth sight lines and perfectly cut angles give the

profile a beautiful and professional finished touch.

With our extensive range of colours, styles, hardware options, locks & gearing you can guarantee that not only will you get a product that can suit every home but is extremely durable and will last for years to come making our PVCu products a cut above the rest!

## 9 POINT LOCKING

With an ever increasing crime rate it has never been so important to have that extra bit of security for your home. That is why all our windows have 9 locking mechanisms making it the safest and most secure window on the market today.

With: 4 x Espagnolette Locks, 2 x Shootbolts, 2 x High Security Friction Hinges and an extra Security Clip - you really will not find a better window system than ours!

- Inboard eurogroove provides greater security.
- All lock gearing is contained inside the profile isolated from any moisture.
- Larger reinforcement chamber providing a very strong robust system.
- Chamber profile with unique drainage system giving excellent thermal performance.

## PVCu COLOURS

**STANDARD COLOURS** - Our products are available in 4 different colour options as standard, so whether you want a classic, crisp white window or a elegant golden oak patio door then look no further!

**ONLY WINDOWS** - Our extensive coloured foil selection is available on the REHAU S706 70mm System. Foil on white and are grained to give an authentic wood finish. Foiled on both sides is available but with a longer lead time.

## VERTICAL SLIDING SASHES

Our vertical sliding window and heritage collection is the perfect option to add class, authenticity and style to any home with its traditional deep bottom rail, slim sashes and optional georgian bar.

With the very latest in security, traditional looks certainly does not mean traditional security. Also, every window has a tilt and turn function which means ease of cleaning and maintenance so you can have sparkling clean windows all year round.

This combined with increased thermal performance and noise reduction you really are looking at some of the best Vertical Sliders on the market today.

**VERTICAL SLIDERS** - Are available in the standard colours and in these 4 unique coloured options in Rehau. If you want more choice of colours please ask about our new Evolve vertical slider.

# PVCu DOORS

With so many beautiful panels and glazing designs to choose from you will be spoilt for choice.

By utilising the best materials and exceptionally high standards of production, our stunning collection of decorative glazed door panels are the perfect choice for any home.

Our PVCu doors are manufactured using the very latest techniques of two-skin bonding to a variety of high quality core materials which increases integrity against heat and moisture.

The type A Expanded Polystyrene we use on all doors is classified under BS476 and is totally recyclable, non toxic and inert. It contains no CFC's or HFC's and contains a fire retardant additive tested to BS4725, formulated to restrict the extent of burn giving it improved performance against fire risks.

## YALE LOCKING SYSTEM

As one of the oldest international brands Yale is among the best known and most respected names in the lock industry. With their high security products, and a commitment to product development it is no wonder that there are millions of customers worldwide securing their homes and businesses with a Yale lock.

## PATIO DOORS

Our patio doors are not just any patio door, with their sleek lines and stunning finishes they can enhance and compliment any home.

With excellent thermal properties and increased security it makes it the best patio door on the market today.

## FRENCH DOORS

Bring the outside inside, with our large opening french doors. The large glazed openings combined with side screen options really bring the outdoors inside, allowing more light to fill your home.

Our french doors conform the very latest in security standards and are available in all the custom foiled coloured options, so not only can you have PAS 23/24 locking and police approved security but you can choose the perfect colour and design to suit your home.

Secured by Design

Police Preferred Specification

## Secured by Design

The standards adopted by Secured by Design give you a high level of protection against criminal attack. Secured by Design Doors means that the door, frame, locking mechanisms and various other security components have gone through extreme testing of simulated break-ins to ensure that you and your family are significantly more safe and secure in your home.

### PAS 23 / 24 Accredited

All of our doors have gone through extreme vigorous testing to ensure that not only can they withstand harsh weather conditions but can protect against various physical invasion methods caused by attempts of burglary.

# COMPOSITE DOORS

We believe that durability and security are paramount in today's market place but also that style and choice shouldn't be limited to meet these requirements.

All of our composite doors come with the most advanced locking systems as standard and combined with its solid laminated veneer lumber core makes it the strongest and safest composite door on the market today.

The highly robust core materials provide exceptional thermal and sound insulation properties whilst creating the perfect barrier to keep all the warmth from your home in and all the loud noises from the street out.

The door is also protected with a blended polycarbonate skin which has a high impact strength, of which similar blends are used in the manufacture of police helmet visors and even riot shields!

**COMPOSITE DOORS** - Are available in these realistic grained choice of panel colours with extra options of having a colour on the one side and white the other or the same colour both sides.

# CONSERVATORIES

The Lean To

The Victorian

The Edwardian

The P-Shaped

By using only the best materials and components such as the REHAU profile, 9 point locking system on all large openers and Yale locking systems as standard on all doors we guarantee you will not find a better conservatory. All of our products are tested by the British Standards Institute and carry the prestigious kitemark BS7950. All this coupled with our huge selection of styles, colours, glazing options and panels we can guarantee that, except the exceptional quality, no two conservatories will be alike.

There are countless companies out there offering what seems to be the same product but it is not. We understand that buying a conservatory for your home requires a lot of consideration, which is why we only use the best components and materials. Furthermore our dedicated staff are with you every step of the way to ensure your dream is realised. With our conservatories you can expect:

- No risk of warping under direct sunlight.
- No holes on rafter fixing, so no risk of water penetration like other conservatories.
- A stronger box gutter to increase strength and eliminate condensation.
- Excellent thermal properties from the high quality REHAU profile.
- Exceptional cooling qualities with our state of the art roof vents.
- All our conservatories come with industry leading accreditations.

**CONSERVATORIES** - Are available in the 4 standard colours of white, golden oak, mahogany and rosewood, but also in these 4 additional specialist colours.

# CONSERVATORY ROOF OPTIONS

**GLASS** - We believe in giving you a wide variety of choice, so whatever qualities you want, with our extensive collection, you can have the perfect roof for your dream conservatory. Our glass roof options offer high G Values and low U Values. The high G Values adds extra solar gain, allowing more heat to pass through the glass making your conservatory warm and cosy. The competitive U Values means that the lower the number, the less heat is lost.

Pilkington Activ™ glass combines dual-action, self-cleaning properties with solar control performance for a cooler internal environment. It is a revolutionary glass that is perfect for use in conservatories. It uses daylight and rainwater to breakdown and wash away organic dirt from exterior surfaces, making it ideal for hard to reach places that are difficult to clean.

**POLYCARBONATE** - Our polycarbonate options offer high thermal insulation and superb light transmission, together with a favourable specific weight to mechanical property ratio, which combine to provide some of the best polycarbonate options around.

Please note: Colours are only as accurate as the printing process allows

# BI-FOLDING DOORS

With great appearance and outstanding quality our bi-folding doors gives your home a modern and sophisticated door system full of excellent benefits. Perfect for opening your home to the garden, allowing light to fill your room making it a much more versatile living experience.

Our bi-folding doors boast superior engineering, utilising REHAU profiles and Yale locking systems, making it the perfect option for your home.

# ENERGY EFFICIENT GLASS

A staggering 26% of all domestic heat loss escapes through the windows. By using Planitherm you could save a staggering 28% on your heating bills each and every year!

Its advanced coating technology reflects radiated heat back into the room, rather than allowing it to escape through the windows. At the same time, Planitherm allows free heat and light from the sun to pass through the glass.

The result? Lighter, brighter, warmer and more energy efficient homes thanks to the advanced thermal insulation of Planitherm.

Planitherm is 3 times more efficient than single glazed units and at least 25% more efficient than most currently installed double glazing!

Heat Loss From A Traditional Window

Heat Loss From A Window with Planitherm

## TECHNICAL SPECIFICATIONS
